Szenarios:

- Fast Advance

Pitched battle with changes: game ends after 5. round, deployment zones are 18" deep (12" apart) and 9" from each side. In the first player turn no charges of any kind can occur (random movement etc. stops 1" away from the enemy).

- Search for warpstone

Pitched battle with changes: 1 token is placed in the center of each quarter. At the end of the game a controlled token counts as 150 victory points. A unit with at least one rank (no skirmishers etc.) in 6" can control a token. If units of both sides are within 6", the side with most ranks (sum of all units in range) gets the 150 points. Newly created units cannot control tokens.

- Destroy the statues

Pitched battle with changes: Two statues (represented by chess figures) are placed on the middleline (equidistantly to sides and themselves). They are impassable terrain and have WS 0, T 10 and W5, are immune to multiple wounds, poison and effects that automatically kill. They can be targeted with all ranged weapons with a strength value and are otherwise immune to any effects. Also they can be charged like an occupied building (10 fighting models, no chariots, close combat ends each round etc.). Each destroyed statue (= taking the last wound) counts as 300 victory points.

Evaluation

5 games will be played. First round is selected by random, after that swiss system is applied (just one game against the same opponent, max. twice against the same army). Tournament points are distributed according to the table.
